KEEPING MERSEYSIDE ON THE MOVE

Merseytravel works to promote the interests of Merseyside's travelling public while providing value for money for its local tax payers. The public sector body co-ordinates public transport through partnership initiatives, with the aim of delivering a fully integrated and environmentally friendly public transport network.

“ We have worked with Harp over a number of years and have successfully completed many station roll-outs. The latest has been the Paradise Street Bus interchange project that has been part of the major re-structuring of the centre of Liverpool by the Grovner Group.

The project lasted the best part of a year and had to deliver a seamless change over from the old Paradise Street Bus Station to the new. So on Saturday evening they were running from one location and Sunday morning they were working from another. This Harp achieved flawlessly.”
